

Your strategic international logistics partner

A quality logistics service provider to the industry since 2017. Our qualified employees do have capabilities to work interdisciplinary to develop a specific logistics solution for any supply chain need. Saubar is committed to excellence, strives to select, work with, and develop new areas of opportunities, capable and prepared to assist in providing effective logistics solutions for our customers today and for the future as needs change and the business climate evolves. Saubar has developed its own Transportation Management System (TMS) which dramatically improved efficiency and flow while reducing miscommunication and waste of time. It is our priority to meet the needs of our customers by handling the highest quality standards.
